V1.1

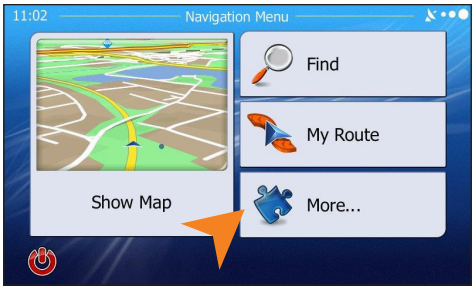
MAP UPDATE INSTRUCTIONS

CAR MEDIA SYSTEMS

naviextras.com®

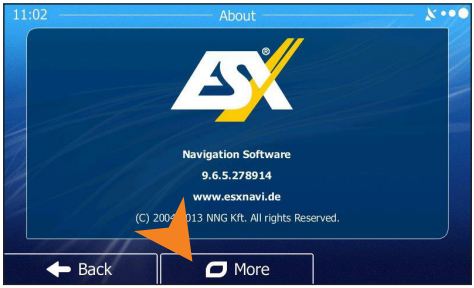
VISION
NAVICEIVER

Start the navigation software on your device.

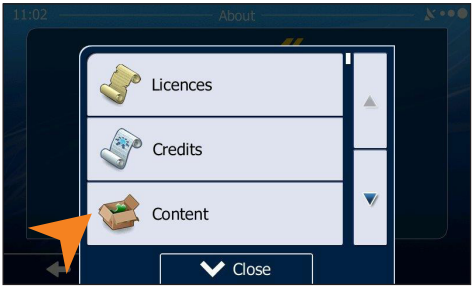


Click on „More ...“ in the main menu.

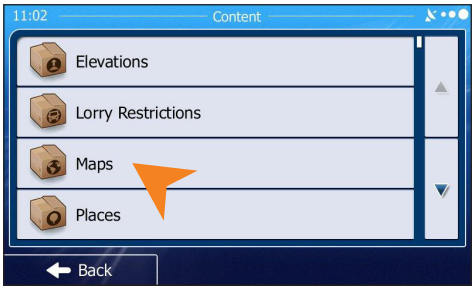
Scroll the screen to the left and then click on „Help“ and then on „About“.



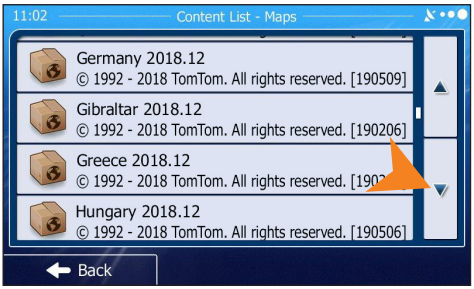
Here you can see the version number of the software. The listed dates are only the date of the development of the software and not of the maps. Then click “More” for more information.



Click on “Content” in the following menu.



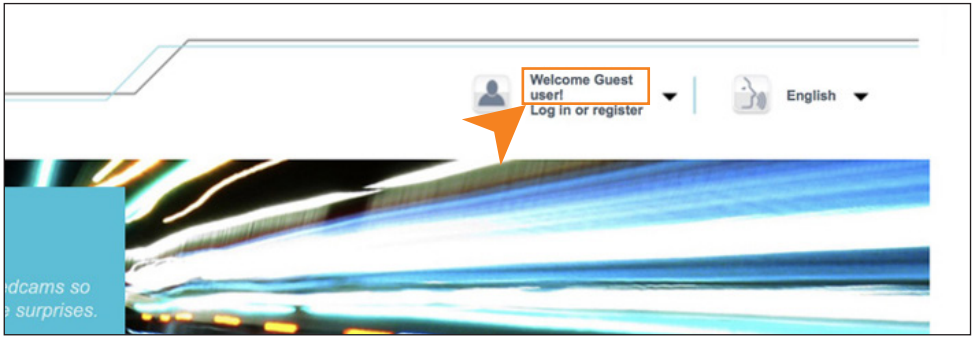
Now click on “Maps”.



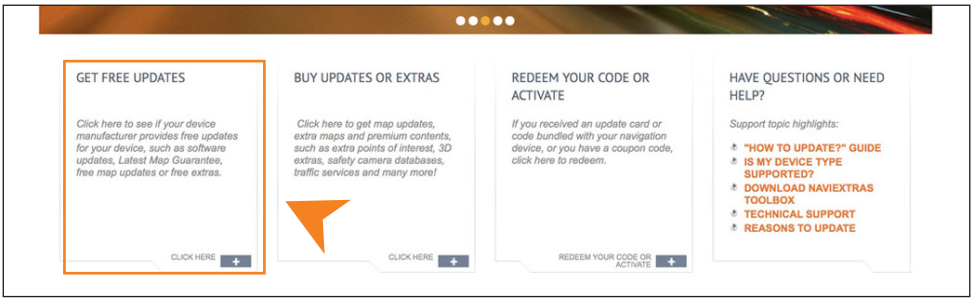
Here you will find the status information of the map for the respective country.

1 **Go to the page www.naviextras.com on the Internet. Register there and create an user account.**

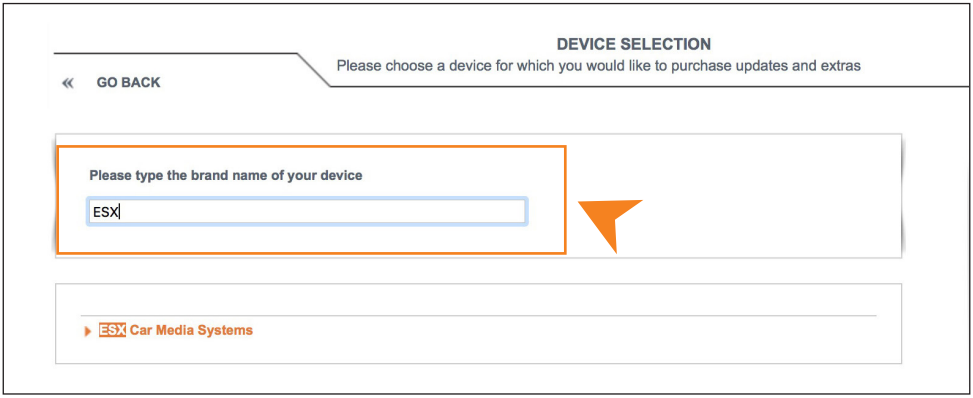
Alternatively, you can simply select the “Guest user” access without registration.



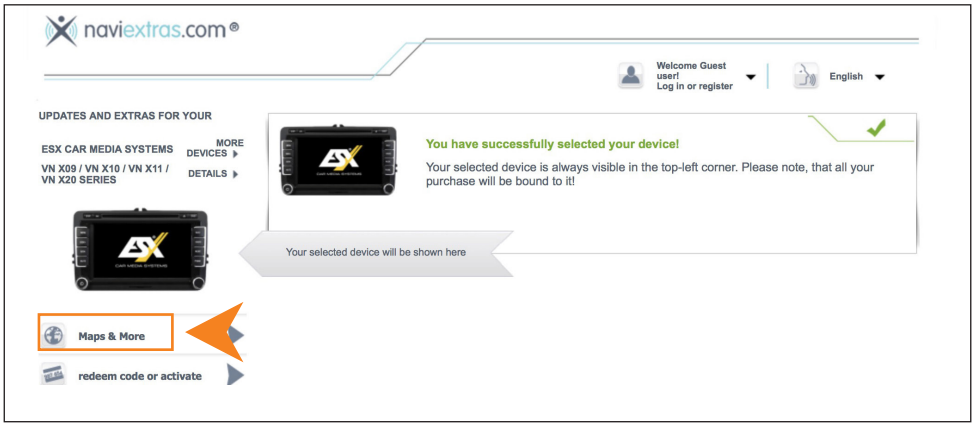
2 Click on “GET FREE UPDATES”



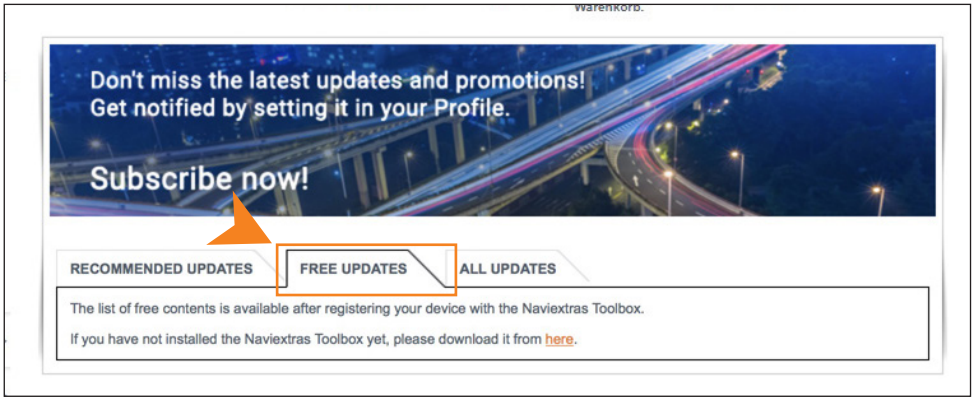
3 Select “ESX Car Media Systems” in the list. Alternatively, you can also enter “ESX” into the search mask.



4 After selecting the device, click „Maps & More“ left below.



5 Click “FREE UPDATES” in the middle, then click the “here” link.



6 Then click “DOWNLOAD” on the lower right.

Naviextras Toolbox is a Windows utility that allows you to install updates and new content on your ESX Naviceiver.

Supported Operating Systems:

- **Windows 7**
- **Windows 8**
- **Windows 10**

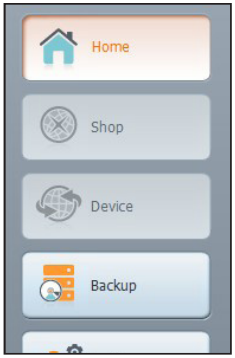
We can not be held liable for any damage or malfunctions to your computer which might result from the download or the installation.

7 **Then open “Naviextras_Toolbox_Setup.exe” on your computer and follow the installation instructions.**

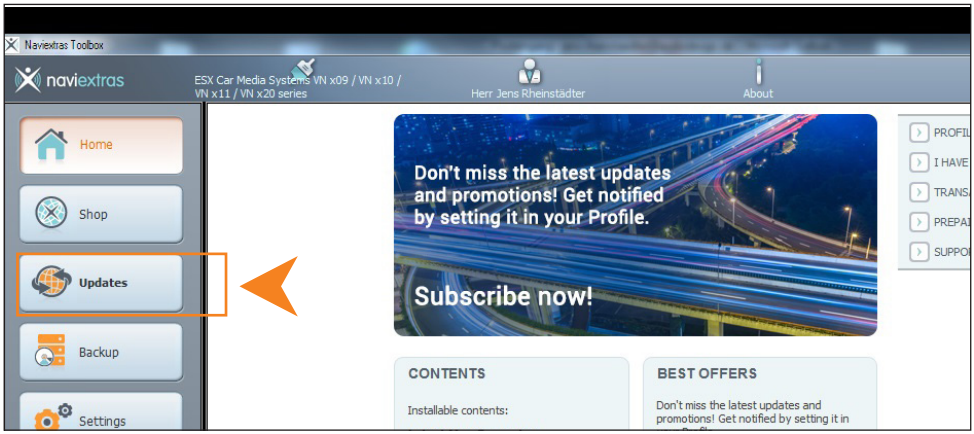
8 **Then start the program “Naviextras Toolbox”**

9 **Then connect a MicroSD card reader to your computer and insert the MicroSD card from your naviceiver.**

10 **After successful connection, the program checks the contents of your MicroSD card.**



11 **If an update is available, the new button “Updates” appears in the left menu bar.**



12 **Click “Updates” to complete the process. The update is about 4 gigabytes in size. Depending on the Internet connection, this process can take some time.**

13 **After the map update has been successfully completed, plug the MicroSD card back into your naviceiver.**

If you have an advanced navigation software license (updateable for 1 year or 3 years), you can repeat the update process from time to time to update the map material of your navigation software.

You can also use the “Naviextras Toolbox” program to purchase additional extras and extensions.
